Mueller NO-BLO Service Tees are used to make main to service connections. These tees are available in a wide range of sizes and inlet and outlet combinations.

The threaded inlet tees can be used with Mueller Service Saddles to make main to service connections that do not require welding.

The tees are available with either weld or external (M.I.P.) thread inlets.

Outlets include weld, thread (M.I.P. or F.I.P.) and compression connections.

### Mueller NO-BLO Service Tee Features

- ❑ COMPLETION CAP – is available in Cast Iron or steel for most tees and provides a secondary seal.
- ❑ COMPLETION PLUG – makes primary seal.
- ❑ INLETS – are available in either weld or external (M.I.P.) thread styles.

- ❑ MAXIMUM WORKING PRESSURE – 250 psig for tees with Cast Iron caps and 1440 psig for tees with steel caps. Tees with compression connection outlets have lower pressure ratings.
- ❑ OUTLETS – are available in weld, external (M.I.P.) thread, internal (F.I.P.) thread, and several popular compression connections.
- ❑ BODY – is machined from solid steel forging for strength.

*a record of leadership & innovation ...*  
Mueller Co. is the largest full-line supplier of flow control products used in distribution systems for municipal potable water and natural gas, and is ISO certified.

# MUELLER® NO-BLO® FORGED STEEL SERVICE TEE FEATURES

REV. 12-06

Mueller NO-BLO Service Tees are used to make main to service connections. These tees are available in a wide range of sizes and inlet and outlet combinations.

The threaded inlet tees can be used with Mueller Service Saddles to make main to service connections that do not require welding.

The tees are available with either weld or external (M.I.P.) thread inlets.

Outlets include weld, thread (M.I.P. or F.I.P.) and compression connections.

## Mueller NO-BLO Service Tee Features

❑ **COMPLETION CAP** – is available in Cast Iron or steel for most tees and provides a secondary seal.

❑ **COMPLETION PLUG** – makes primary seal.

❑ **INLETS** – are available in either weld or external (M.I.P.) thread styles.

❑ **MAXIMUM WORKING PRESSURE** – 250 psig for tees with Cast Iron caps and 1440 psig for tees with steel caps. Tees with compression connection outlets have lower pressure ratings.

❑ **OUTLETS** – are available in weld, external (M.I.P.) thread, internal (F.I.P.) thread, and several popular compression connections.

❑ **BODY** – is machined from solid steel forging for strength.

- Catalog number – **H-17500**
- Sizes\* – 3/4" x 3/4", 1" x 1", 1-1/4" x 1-1/4", 2" x 2"
- Forged Steel Body ASTM A105
- Cast Iron Completion Cap ASTM A126 CL.B
- Brass Completion Plug
- Weld inlet
- Outlet prepared for butt weld same size as outlet and socket weld one size smaller than outlet
- 250\*\* psig (1724 kPa)

**H-17500**

## How to select equipment

- 1) Find chart on following pages containing desired combination of fitting and installation machine (shown in bold type at top of each page and chart). Note: for a given fitting there may be more than one machine and chart.
- 2) Under inlet size of fitting to be installed, select catalog number for type of control valve to be used. Options may include one or more of the following: H-10914 Bronze Gate Valve, H-17025 Control Chamber, H-10917 Slide Gate Valve, H-10918 Steel Ball Valve.
- 3) Under selected control valve, column lists equipment necessary for each operation on chosen size of fitting. Note: **MAOP** (Maximum Allowed Operating Pressure) provided for *each* operation must not be exceeded. MAOP may be different for each operation.

## Dimensions

Dimensions	Size* of Service Tee			
	3/4" x 3/4"	1" x 1"	1-1/4" x 1-1/4"	2" x 2"
A	4"	4-1/8"	4-5/8"	5-1/2"

\*Maximum Allowable Operating Pressure

†In stopping section of chart, Maximum Allowable Operating Pressure (MAOP) applies to use of rubber shut off tool only. For steel shut off tool, variables in hole drilled in pipe may or may not allow similar MAOP.

- Catalog number – **H-17503**
- Sizes\* – 1-1/4" x 1-1/4", 3" x 3", 4" x 4"
- Forged Steel Body ASTM A105/A234WPB
- Cast Iron Completion Cap ASTM A126 CL.B
- Cast Iron Completion Plug ASTM A126 CL.B
- O-ring Sealed Completion Plug
- Weld inlet
- Outlet prepared for butt weld same size as outlet and socket weld one size smaller than outlet
- 250\*\* psig (1724 kPa)

**H-17503**

### How to select equipment

- 1) Find chart on following pages containing desired combination of fitting and installation machine (shown in bold type at top of each page and chart). Note: for a given fitting there may be more than one machine and chart.
- 2) Under inlet size of fitting to be installed, select catalog number for type of control valve to be used. Options may include one or more of the following: H-10914 Bronze Gate Valve, H-17025 Control Chamber, H-10917 Slide Gate Valve, H-10918 Steel Ball Valve.
- 3) Under selected control valve, column lists equipment necessary for each operation on chosen size of fitting. Note: **MAOP** (Maximum Allowed Operating Pressure) provided for *each* operation must not be exceeded. MAOP may be different for each operation.

### Dimensions

Dimensions	Size* of Service Tee		
	1-1/4" x 1-1/4"	3" x 3"	4" x 4"
A	4-5/8"	9"	8-3/8"
B	2"	3-3/8"	4-1/8"
C	1-1/2"	3"	4"
D	1-3/8"	2-7/8"	3-7/8"

### Replacement Parts

Replacement Parts	Size* of Service Tee		
	1-1/4" x 1-1/4"	3" x 3"	4" x 4"
Completion Cap	38138	36312	502944
Completion Plug	503445	502955	580911
Completion Plug O-ring	40709	503164	60192

\*First size is size of inlet, second is size of outlet.

\*\*This is the maximum pressure of the fitting installed in the line at 100F for Class Locations 1, 2, 3 and 4 as defined in D.O.T./CFR TITLE 49 PART 192. It may be necessary to reduce the line pressure during the drilling, stopping or plugging operations to the maximum working pressure of the machine or its attachments. Refer to charts on following pages.
