

MUELLER® Spherical Fitting

Expands Your No-Blo® Options

Forged steel fittings have integral shoulders to support the fitting when welding it onto the pipe. Field tested welding procedures do not require the use of special jigs or alignment devices to obtain a proper installation. Tested compatibility with Mueller No-Blo Line Stopping Equipment. Compatible with Mueller Steel Wedge and Bottom-Out Stoppers. Available in 4"–12" sizes for standard and thin wall pipe, and a range of flange options.

When it's not clear what obstructions might be in the area of a fitting installation, or you simply want to reduce inventory of fitting styles, the Mueller Spherical Fitting can offer valuable options. It can be used for extensions, crossovers, tie-ins, relocations and lateral connections at the centerline or from the bottom of existing pipelines. This flexibility is especially useful when other utilities or natural obstructions are close by the pipeline.

The Mueller® No-Blo® System is now compatible with the spherical style of stopper fitting. It's possible to connect to either side or the bottom of a line using a Mueller Spherical Line Stopper Fitting by simply changing how the halves of the fitting are welded in place. Most important, the fitting uses standard Mueller No-Blo Stopper Equipment – the industry standard for safety and reliability.

- Fitting may be installed for bottom-out or side-out configuration.

Contact your Mueller Sales Representative or authorized Mueller Distributor to discuss the use of the Mueller Spherical Line Stopper Fitting.

Mueller® No-Blo® Spherical Line Stopper Fittings – Welded Type

Size	Pipe	Outlet Pipe	Flange Class	Max. Working Pressure	Catalog Number
4", 6", 8", 10", 12"	Std	Sch 40	150#	285 psig	H-17460
4", 6", 8"	Std	Sch 40	300#	740 psig	H-17461
